

Recent Transition After Enact of Geospatial Information Law – Indonesian Experience

Fahmi Amhar and Sora Lokita (Indonesia)

Key words: Coastal Zone Management; Legislation; Geospatial Law; Transition; Capacity Building

SUMMARY

Since 2011 Indonesia has a Geospatial Information Law which makes many changes in geospatial landscape. The Law has empowered some institution with clear tasks and responsibilities about Basic Geospatial Information or Thematic Geospatial Information. The Law has endorsed capacity building in related manners. The law also gives special reward and punishment in serving or using geospatial information. The transition of the nation with the law will be described in this paper.
