SUMMARY

Providing leadership as FIG, as well as increasing the impact on the 2030 Agenda and the SDGs is an important element in the FIG 2023-2026 theme “Serving society for the benefit of people and planet; tackling the global challenges” for the term 2023-2026. FIG has the capacity to provide the platform to inform, discuss, exchange and act towards a more sustainable world and to ensure that our community meets the needs of the markets and communities that we serve. The Task Force on FIG and the SDGs will support FIG council, the commissions and networks to provide leadership and increase impact towards the 2030 Agenda and the SDGs. As well as provide a platform for the FIG community to raise awareness and to inform and inspire the FIG community on the 2030 Agenda and the SDGs and, towards the end of the current term, begin to position FIG for the next iteration of sustainability within the UN habitat agenda (ie. Post 2030). The aim is that by the end of the term the relevance of the 2030 Agenda and the SDGs is embedded within FIG.

With this paper we encourage the FIG community to take ownership to contribute to the 2030 Agenda.
